## KARAOKE BOOTHS

### WHAT IS A SINGA KARAOKE BOOTH?

Private karaoke rooms (also called karaoke booths, karaoke boxes, KTVs) are a growing trend in the hospitality industry. They are a great way to entertain your customers (and do so safely during these uncertain times) whilst boosting your revenue. There are a variety of options available from smaller booths to private rooms, and the set-up can be adapted for every kind of venue. The Singa and audio is installed to be useable both privately and throughout the venue to allow the system to be an alternative to a karaoke DJ.

### HOW DOES A SINGA KARAOKE BOOTH WORK?

Most karaoke booths are on a pre-book basis. The customer can pre-book 2-3 hour timeslots and you can choose whether or not to charge for the hire (there are other models available). The systems we use are really simple - turn on the microphones and you're ready to go! The Singa app is easy to use and really intuitive.

TWO PERSON BOOTH

*This two person karaoke booth was installed during a refurbishment. The Singa tablet can be shown on all screens throughout the bar & to allow audio to be heard in every zone, as well as being totally isolated.*

SINGA ALL-IN-ONE

*The all-in-one Singa standalone system - just add power for show-stopping karaoke in under 2 hours. Includes TV, Speaker, iPad running software, enclosed in a kiosk case, 4 microphones & an RGB LED lighting system.*

8 PERSON BOOTH

*This Medium sized karaoke booth has seating for up to eight people, with the screen set away to allow a singing area. There is also a unique Nano Leaf Rhythm light installed.*
